

NAME

showone – Overlay the keypoints on its image

SYNOPSIS

showone.exe *keyfile[.gz]*

DESCRIPTION

Display the image associated with the keyfile. For each keypoint in the keyfile, show a circle around its center position. This is to analyze the overall distribution and density of the keypoints for an image. For normal users, this program is of no big interest.

OPTIONS

keyfile[.gz]

The filename of the keypoint file. When ".gz" is appended, the file is decompressed using **gzip**(1).

BUGS

No bugs known, if you find any, please send a bug report to me. I will try to fix it.
